DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-2 are rejected under 35 U.S.C. 102(e) as being anticipated by Matsuda et al. (U.S. Patent No. 6,500,976).

The applied reference has a common inventor with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

Applicant cannot rely upon the foreign priority papers to overcome this rejection because a translation of said papers has not been made of record in accordance with 37 CFR 1.55. See MPEP § 201.15.

For claims 1 and 2, in column 9, lines 10-35, Example 3, Matsuda teaches the synthesis of a fluorinated organosilicon compound falling within the definition of the compounds set forth in the claims. Here applicant's Z group =-(CH₂)₂-, which in claim 2

Art Unit: 1712

corresponds to a $g=2$. Also, $a=2$, $b=1$, $c=3$, $d=0$, and $e=1$. These conditions satisfy the provisos set forth by applicant, where $a+c=5$, and $b+d=1$. None of the variables has a value greater than 3. In addition, R^1 =methyl and Rf^1 is a perfluorooxyalkyl group. Here also $X = -Y-NR^2-CO-$, where R^2 =methyl and Y =structural formula (I).

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Takago et al. (U.S. Patent No. 5,288,829) and Hamada et al. (U.S. Patent No. 5,578,381) are cited for being of general interest.
